Spent over 1500 hours of intensive study across two MVC frameworks, one MTV framework, and multiple web technologies.

2005 - 2007

Bachelor of Science, Psychology

Portland State University

Attained a B.S. in Psychology with a focus in child development.

PROJECTS

Meetup site

My friends and I have a lot of things going on in life and it is harder to keep in touch these days so I built this site to allow us to keep in touch and invite others to events we have going on. Friends can add events and invite others to it. All members can view events and see who is attending and the location of the event. I thought this was a great way for us to keep in touch with each other and it has helped us stay close.

- Front-End built using HMTL, CSS/SASS, Javascript, JQuery, Bootstrap 4
- Back-End built using Django and database using MySQL

Recruiter site

- MVC, MTV, OOP, RWD, TDD
- RESTful Architecture

I built this site for a client starting her own recruiting company. Potential clients can see what services the company offers, fees, and read profiles on every recruiter that is currently working for the company. The site is connected to the company blog and social sites.

- Front-End built using HMTL, CSS/SASS, Javascript, JQuery, Bootstrap 4, popper.js, tooltip.js
- Back-End built using MEAN and database using noSQL

VOLUNTEER EXPERIENCE

Clackamas Women's Service (CWS) 2001 - 2006

I worked with the children of the abused women at the shelter. My role was to see how their situation had affected them and to what extent. What resources would best help the child moving on from the shelter and to put the mother in contact with those resources..
